TITLE GOES HERE: The three graphs below show the distribution of weights broken down by sex. The violin layer is the same in each graph. Each graph has a coverage interval at one of these levels: 25% 50%, 80%, 95%. Which graph has which coverage interval? Which of the listed coverage intervals is not shown in any graph?

-A- Graph (a) is 80%; Graph (b) is 50%; Graph (c) is 95%. There is no 25% interval shown. If there were, it would fit well within the 50% interval.
